SUMMARY

Aspiring DevOps engineer with a keen interest in cloud technologies like AWS and Docker. Well-versed in various web development tools such as HTML/CSS, Javascript, MySQL, MongoDB, Express.js and React. Driven Full Stack Engineer with a firm belief that education never stops, especially in the ever dynamic tech industry. Demonstrated experience creating web apps utilizing server routing, API calls to a private database, and jQuery. Equipped with skills to create products, adapt quickly, and find creative solutions to problems.

TECHNICAL SKILLS

Languages: Javascript, HTML/CSS, SQL, C/C++, Python, C#, Go
Applications: Node.js, React, AWS, Docker, Linux, Git/Github, GNU Debugger(GDB), MySQL, MongoDB, .NET

PROJECTS

Finn-Moji | https://github.com/BogacSabuncu/finn-moji **|** finn-moji.herokuapp.com
- Finn-Moji is a full-stack app that helps users to manage their finances with a simple workflow and elegant UI.
- Implemented back-end code as Project Manager for testing with Mocha and Chai, API calls with Express.js and front-end code and state management with React and React-Vis.
- Javascript, React, Node.js, Express.js, Mongo, Mocha/Chai

Nibble Neighbor | github.com/BogacSabuncu/NibbleNeighbor **|** nibbleneighbor.herokuapp.com/
- Nibble Neighbor is a full-stack app that lets the user create an account and then search and save recipes to their profile. The search is done by making an API calls and then the results are displayed to the user on the page. When the user saves a recipe the necessary information is saved to a MySQL database where the information can be retrieved about a specific user when needed.
- Implemented back-end code as Project Manager for routing with Express.js, data storage with MySQL, and front-end code for user page using jQuery and CSS.
- Javascript, jQuery, Node.js, Express.js, MySQL, HTML/CSS

Searcherr | github.com/BogacSabuncu/Searcherr **|** bogacsabuncu.github.io/Searcherr/
- Browser job-search tool allowing users to see postings one by one, where they can view different aspects of a job: company, position, salary range, job description and location and save it to apply later.
- Implemented the backend code for API calls to receive job postings as the Project Manager
- Javascript, jQuery, HTML/CSS, Firebase

EXPERIENCE

IT Support Specialist   2018 - Present
SRS International Group, LLC   Atlanta, GA
Seamlessly installed and configured relevant business software on company computers without interrupting day to day operations. Responded to IT inquiries and applied creative solutions to a wide variety of problems. Demonstrated ability to communicate with upper level management and engage in decision making.
